Introduction to the layout:

Instructions:

1. For Model A in the model panel, (1) untoggle the feature you want to exclude from the model, and (2) select the values you want to use in the prediction. For example, Age: 42 | Gender: Female | Race: Black | Weekly income: 6K (in cents). Note that as long as you have a feature in the mode, you have to specify that feature's value before moving on.
2. Click the "update model" button.
3. Do the same thing for Model B and Model C.
